REFERENCE LETTER RESILIENT WHEELS AND WHEEL TYRES

Dear Sir/Madam,

This letter is written to confirm that Bochumer Verein Verkehrstechnik GmbH has delivered resilient wheels Bo 2000 installed on all low-floor trams that we had produced since 2005. All the wheels are equipped with wheel tyres made from "Excelsior" material which we buy as spare/consumable parts since 2005.

The number of trams is 156 (1808 wheels) with a total mileage of more than 113 million kilometres.

The performance of the wheels and wheel tyres has been exceptional with a quality level that meets our strict requirements. We found Bochumer Verein Verkehrstechnik GmbH to be very cooperative to deal with.

Bochumer Verein Verkehrstechnik GmbH has been able to design and manufacture the wheels and wheel tyres that meet our technical requirements as well as all relevant European norms and standards.

We would have no hesitation in recommending Bochumer Verein Verkehrstechnik GmbH to any builder of tram cars as a reputable supplier of equipment and services.

Yours faithfully,

Končar Electric Vehicles Inc.
